

CMIS COVID-19 PROTOCOLS

Date Updated: September 30, 2022

PERSONAL PREVENTION PROTOCOL

On 30th September, 2022, Thailand's Center of COVID-19 Situation Administration (CCSA) ended the nationwide COVID-19 Emergency Decree. The Thailand Ministry of Public Health has reclassified COVID-19 from 'a dangerous communicable disease' to 'a communicable disease under surveillance' starting from 1st October, 2022.

The Ministry of Public Health has assessed that the Covid-19 situation will gradually ease into the same level as influenza, meaning that it will be easily transmitted but won't cause severe symptoms to those who are fully vaccinated.

The personal prevention protocols continue to be our best defense against COVID-19 and we still encourage all to maintain a high standard of care.

This guideline has been updated according to the latest government announcement and updated school data become available.

Circulation

SCHOOL BASED PREVENTION PROTOCOL

The following applies to all students, faculty, and staff on campus:

- Wearing a face mask
 - Masks are optional on campus. They are recommended for those with respiratory symptoms or when in crowded spaces.
- Frequent hand washing or sanitizing will be required.
 - Hand washing stations are easily accessible
 - Wash hands upon arrival to campus
 - Wash hands after breaks
 - Wash hands before and after lunch
 - Wash hands after using the toilet
- Students should bring their own water bottles.
- Encourage all students, faculty and staff to keep distancing on campus as much as possible.
- Our dedicated cleaning staff will adhere to strict cleaning schedules throughout the day.
- Air purifiers (HEPA) will be on inside the classrooms, and workspaces, while students are on campus.

“YOUR HEALTH IS OUR TOP PRIORITY.”
